

THOMPSON LARGE CAP FUND[®] - THPGX

DECEMBER 31, 2023

Investment Objective

The Thompson LargeCap Fund seeks a high level of long-term capital appreciation.

Investment Philosophy

We believe that earnings growth and price-earnings multiple expansion drive long term stock returns and relative performance. With this in mind, our investment team uses fundamental analysis to identify companies that have the potential to grow earnings faster than their peers. We favor companies with consistent free cash flow and balance sheets with modest debt levels. The stocks of these companies are purchased if they are trading at attractive valuations, often because of a temporary short-term problem or misperception. In the end, we simply seek to own the best companies in the best performing market sectors, and not overpay for them.

Gross of fee waivers or reimbursements	1.16%
Net Expense Ratio – Effective 3/31/23	0.99%*

Performance data quoted represents past performance: past performance does not guarantee future results. The investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-999-0887 or visiting www.thompsonim.com. The performance information reflected in the table above does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

*The Advisor has contractually agreed to waive certain expenses through March 31, 2024. Investment performance reflects fee waivers in effect. In the absence of such waivers, the returns would be reduced. Net expense ratios are current as of the most recent prospectus and are applicable to investors.

The S&P 500 Index is an unmanaged index commonly used to measure the performance of U.S. stocks. You cannot directly invest in an index. The S&P 500 Index is a product of S&P Dow Jones Indices LLC and has been licensed for use by Thompson Investment Management, Inc. S&P[®] and S&P 500[®] are registered trademarks of Standard & Poor's Financial Services LLC ("S&P"). The Thompson IM Funds are not sponsored, endorsed, sold or promoted by S&P Dow Jones Indices LLC, Dow Jones, S&P or their respective affiliates, and none of S&P Dow Jones Indices LLC, Dow Jones, S&P nor their respective affiliates makes any representation regarding the advisability of investing in such products.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling 800-999-0887 or visiting www.thompsonim.com. Read it carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Investments in smaller companies involve additional risks such as limited liquidity and greater volatility. Investments in real estate securities may involve greater risk and volatility including greater exposure to economic downturns and changes in real estate values, rents, property taxes, tax, and other laws. A real estate investment trust's (REITs) share price may decline because of adverse developments affecting the real estate industry. Investments in American Depository Receipts (ADRs) are subject to some of the same risk associated with directly investing in securities of foreign issuers, including the risk of changes in currency exchange rates, expropriation or nationalization of assets, and the impact on political, diplomatic, or social events. Results include the reinvestment of all dividends and capital gains distributions.

While the fund is no-load, management and other expenses still apply.

Quasar Distributors, LLC distributor.

The Morningstar Style Box[™] reveals a fund's investment strategy. For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth).

The Morningstar Rating[™] for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Thompson LargeCap Fund was rated against the following numbers of U.S.-domiciled Large Value funds over the following time periods: 1131 funds in the last three years, 1075 funds in the last five years, and 821 funds in the last ten years for the period ending 12/31/2023. With respect to these Large Value funds, Thompson LargeCap Fund received a Morningstar Rating of 2, 4, and 3 stars for the three-, five- and ten-year periods. ©2023 Morningstar, Inc. P/E Ratio: A valuation ratio of a company's current share price compared to its per-share earnings. Divide market value of a share by the earnings per share.

Free Cash Flow: Measure of financial performance calculated as operating cash flow minus capital expenditures. Free cash flow (FCF) represents the cash that a company is able to generate after laying out the money required to maintain or expand its asset base.

Weighted Average Market Cap.: The weighted average market cap is the average market capitalization of all companies in a fund - with each company weighted according to its percent held in the fund.

Portfolio Management Team

James T. Evans, CFA

Mr. Evans, Chief Investment Officer, graduated summa cum laude from Macalester College with a B.A. degree in Economics and Computer Science. He also earned an M.B.A. in Finance and Accounting and an M.S. in Finance from the University of Wisconsin-Madison.

Jason L. Stephens, CFA

Mr. Stephens, Chief Executive Officer, received a B.S. in English and Communication Arts, an M.A. in Arts Administration and an M.S. in Finance, each from the University of Wisconsin-Madison.

Performance

The LargeCap Fund produced a total return of 13.11% for the quarter ended December 31, 2023, as compared to its benchmark, the S&P 500 Index, which returned 11.69%. The Fund's total return for all of 2023 was 21.92% versus 26.29% for its benchmark.

Management Commentary

The fourth quarter of 2023 was a rewarding one for shareholders, as equities rallied based on positive inflation and other economic data that suggested to investors that the Federal Reserve would be successful in its attempt to engineer a “soft landing” for the economy. Crucially, this rally broadened to include many of the stocks outside the so called “Magnificent Seven” mega capitalization stocks of Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Telsa. These seven firms had dominated the market’s return during the majority of the year due to various factors such as hype over AI and hopes that they were large enough to be recession resistant.

Given this backdrop, we were pleased with the Fund’s 2023 performance, as the Fund trailed the S&P 500 by an amount that was entirely based on the returns of 3 stocks – Amazon, Nvidia and Tesla. Notably, the Fund far outpaced the equally weighted version of the S&P 500 during the year. We feel that by keeping performance relatively close to the index despite our Fund’s bias towards Growth at a Reasonable Price (GARP) and Value oriented stocks, we performed well when our style was on “defense.” This means there is less ground to make up if the market’s rotation towards a broader mix of stocks continues and makes our investment style go on “offense.”

We strongly believe the market is poised to reward investors who invest in value and core strategies that reflect more of a sensitivity to valuation. As we have noted in previous commentaries, the concentration of the S&P 500 within its largest holdings and their relative valuation to the rest of the index is near levels last seen at the peak of the Technology Bubble in 2000. Even a partial reversal of these metrics would substantially reward investors who have purchased securities in the value and non-mega capitalization sectors of the market. The Fund is positioned to take advantage of this trend if it occurs. We believe a successful soft landing by the Federal Reserve will act as the catalyst to propel this trend.

We look forward to 2024 and believe the Fund will enjoy competitive returns for the new year and beyond.

Before you invest in the Funds, please refer to the [prospectus](#) for important information about the investment company, including investment objectives, risks, charges and expenses. You may also obtain a hard copy of the prospectus by calling 1-800-999-0887. The prospectus should be read carefully before you invest or send money.

Fund holdings and sector allocations are subject to change and should not be considered a recommendation to buy or sell any security.

Opinions expressed are subject to change, are not guaranteed and should not be considered investment advice.

Growth at a reasonable price (GARP): An equity investment strategy that seeks to combine tenets of both growth investing and value investing to select individual stocks.

Earnings Growth is a measure of growth in a company’s net income over a specific period, often one year. It is not a prediction of the Fund’s future returns.

Past performance is not a guarantee of future results.
